### Scope of Work

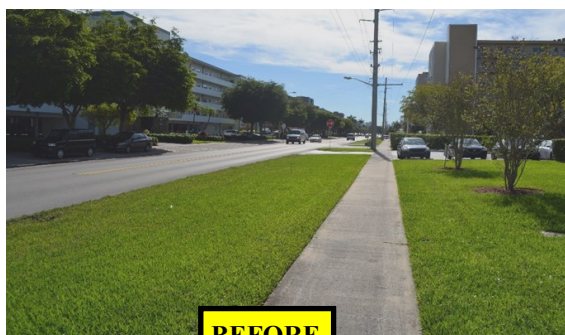

- Provide landscaping of the west swale area with canopy trees intermingled with ground cover and irrigations.
- Provide landscaping screening along the north, south, and west sides of the two (2) storm water pump stations.
- Addition of bike lanes on both sides of the roadway.
- Installation of curbing treatments at the existing driveway entrances on the west side of the roadway.
- Repave on-street parking and provide curbed landscaped and irrigated islands at the driveways on the east side of the road.
- Repave the entire roadway and pavement markings.
- Addition of two bus shelters on the west side of the roadway and benches on the east side at the bus stops locations.
- Resting areas with benches.
- Addition of mid-block crosswalk.
- Installation of concrete block pavers for maintenance access drives on each side of the two storm water pump stations.
- Landscape maintenance service for one year.

### Project Limits:

**NE 14th Avenue** from East Hallandale Boulevard to Atlantic Shores Boulevard.

### Construction Budget:

The construction budget is estimated at 1.5 million and is paid by the City's various funds and by the Hallandale Beach Community Redevelopment Agency HBCRA.
